Corporate Culture

People-oriented, customer first, continuous innovation, and steady development; leveraging professional strengths to create the best quality in the industry. Through strict system management and professional craftsmanship, we are committed to providing high-quality products and services to enterprises over the long term.

Corporate Mission

Guided by the corporate spirit of integrity, dedication, efficiency, and harmony, we continuously strive for progress and innovation to achieve our goals — making "Chenjie" a pioneer in China's wireless remote control industry and a renowned global brand in wireless intelligent products.

Service Tenet

Quick response and immediate execution. Customer first, service foremost. Customer satisfaction knows no limits.

Social Responsibility

Abide by laws and regulations, fulfill social responsibilities, support public welfare initiatives, and achieve harmonious development between the enterprise and society.

Core Values

Professionalism creates quality, focus achieves greatness.

Corporate Motto

Together at Chenjie, we set sail for the future; united as one, we strive for excellence.

Corporate Spirit

Integrity and unity, pragmatism and innovation; be enterprising and strive for greater heights.

Quality Standard

Scientific design, pursuit of perfection, continuous improvement, and the quest for excellence. All operations are carried out in strict accordance with ISO 9001 standards.

Competitiveness

With years of accumulated technology and experience, the company boasts multiple senior wireless smart home software engineers with over 15 years of expertise, five hardware R&D engineers, and more than 20 staff members holding college degrees or higher. We are fully capable of developing various types of wireless smart home remote control products. In addition, we provide supporting production for numerous manufacturing enterprises, including wireless remote controllers, electric door controllers, rolling door control systems, Wi-Fi and GSM controllers, motion sensor switches, and high-frequency wireless transceiver modules — forming a complete series of intelligent home products.

**A Powerful and
Reliable Enterprise**

COMPANY PROFILE ◎

Shenzhen Chenjie Electronic Co., Ltd. was established in 2012, a well-known brand for over a decade. It is a national high-tech enterprise that integrates research, production, sales, and services. With a workforce of over 100 employees, the company boasts a team of experienced wireless RF hardware and software development engineers, along with a state-of-the-art SMT workshop with a cleanliness level of 100,000. In 2015, the company became one of the first in the industry to obtain ISO9001:2015 international quality management system certification. In 2016, it received certification from the China Quality Certification Center (CQC), followed by multiple product certifications such as FCC in 2018, EU CE certification and US UL certification in 2019, and China Compulsory Certification (CCC). In 2021, the company was recognized as an AAA-level integrity operation demonstration unit by the 315 National Credit System Integrity Enterprise Certification Center, receiving various AAA-level certificates.

The company specializes in the research and production of wireless remote controllers, infrared remote controllers, copy remote controllers, universal remote controllers, multi-brand universal remote controllers, smart voice remote controllers, garage door remote controllers, domestic and foreign car remote controllers, wireless remote switches, electric door controllers, rolling shutter door controllers, garage door controllers, WiFi controller remote sockets, LED color-changing light controllers, GSM remote control switches, 4G traffic control switches, remote control switches for water pumps, motion sensor switches, motion sensor modules, high-frequency 315MHZ/433MHZ/868MHZ/915MHZ/2.4G full-frequency wireless superheterodyne receiving modules, transmission modules, telephone anti-theft alarms, on-site alarms, and other automotive electronics and smart home products.

The company's products have gained high recognition and strong support from well-known domestic and foreign listed companies and manufacturers. Adhering to a professional spirit, the company has meticulously crafted over 600 high-quality and distinctive intelligent products, providing customized production for various manufacturers in different industries such as electric curtains, tubular motors, electric doors, barrier gates, parking lots, central locking systems for cars, intelligent building intercoms, remote control of water pump motors, and anti-theft alarms, meeting the diverse needs and special customization requirements of large-scale production enterprises.

Company Philosophy: People-oriented, customer-first; continuous innovation, steady development; leveraging professional advantages to create the best quality in the industry. With strict systematic management and professional craftsmanship, the company has long provided enterprises with high-quality products and services. Through years of technical and experiential accumulation, the company's professional wireless senior software and hardware development engineering team continuously leads in innovation, possessing strong professional capabilities in developing new products. The company adheres to the principle of "Professionalism creates quality, Focus achieves greatness." Guided by the spirit of integrity, dedication, efficiency, and harmony, the company continually advances and innovates, striving to achieve the goal of working towards the establishment of a century-old enterprise.

Let "Chenjie" become the pioneer of China's wireless remote control switch!

Let "Tatsuo Jie" become a well-known brand of wireless remote control intelligent products in the world!

RF433M Slim . Infrared Remote Control

General-purpose infrared remote control system consists of two major parts, the transmitter and receiver. The application of coding/decoding special integrated circuit chip to control the operation, the transmitter part includes the keypad matrix, coding modulation, LED infrared transmitter; the receiver part includes optical and electrical conversion amplifier, demodulation, decoding circuit.
